PARTIES, VENUE AND JURISDICTION

- At all times relevant to this Complaint, Plaintiff was and is a resident of
- At all times relevant to this Complaint, Defendant was and is a New Jersey corporation with its principal place of business at 325 Corporate Drive, Mahwah. Bergen County, New Jersey 07430. At all times material hereto, Defendant regularly did business in the State of Washington, including Pierce County, where Defendant's agents and/or employees selected and provided the specific Acocolade manufactured by Defendant and 10 delivered to Plaintiff's operating room at St. Clare Hospital, which Defective Product was
- Plaintiff's injuries were sustained in Pierce County, Washington and 13 jurisdiction and venue are proper in Pierce County, Washington.

GENERAL ALLEGATIONS

TOTAL HIP ARTHROPLASTY

- Total Hip Arthroplasty (hereafter "THA") is the term used to describe 17 surgery wherein is patient's natural hip anatomy is replaced with synthetic components. 18 THA is also commonly referred to as "hip replacement surgery." A patient may need a 19 THA for a variety of medical reasons, including degenerative bone disease and avascular 20 necrosis.
- 6. The process involves traumatic surgery in which a surgeon saws and 22 removes a considerable portion of bone, including the ball, from the top of the femur. In 23 place of the removed bone, the surgeon places a metal shaft, called a "stem", down into FIRST AMENDED -CRANE DUNHAM, PLLC COMPLAINT FOR DAMAGES - 2 2121 FIFTH AVENUE SEATTLE, WASHINGTON 9812)-2510

206.292,9090 FAX 206,292,9736 ddunham@cranedunham.com

- 7. The surgeon also replaces the anatomical hip socket, the acetabulum, with 8] an artificial "cup" against which the new, synthetic ball articulates. In order to do so, the surgeon removes bone from the natural acetabulum until it is large enough to house a 10 synthetic cup. The surgeon then places a synthetic cup into the hip socket. The cup affixes to the bone either through the use of bone cement or through the use of a porous metal coating on the back of the cup into which the natural bone will grow.
- 13 8. A successful THA results in a hip prosthesis that should last 20+ years in a 14 patient.
 - 9. If a hip prosthesis fails in a patient, the patient's surgeon may recommend a "revision" THA procedure in order to replace the failed hip components.
 - 10. A revision THA is extremely traumatic to a patient, multiudes more so than a primary THA. The surgery is typically much longer, with greater blood loss, greater surgeon difficulty, and greater mortality rate. Further, the rehabilitation period for a revision THA is much longer.
 - In most revision THA procedures, the synthetic components that must be 11. replaced are either the acetabular cup or the femoral ball or both.

STRYKER HIP SYSTEM

FIRST AMENDED -COMPLAINT FOR DAMAGES -3

20

21

1	12.	Defendant designs and manufactures various medical devices and implants.	
2	13.	According to Styker's website,	
3		Stryker is one of the world's leading medical technology	
4		companies and is dedicated to helping healthcare professionals perform their jobs more efficiently while enhancing patient care.	
5		The Company offers a diverse array of innovative medical technologies, including reconstructive medical and surgical, and	
6		neurotechnology and spine products to help people lead more active and more satisfying lives.	
7	14.	Further Stryker's website ² also claims,	
8		Stryker is the worldwide market leader inTotal Hip Replacement	
9		products. The company has achieved this position through innovations and by meeting requirements for hip arthroplasty	
10		products that hep restore patients to normal daily activities.	
11	15.	Regarding femoral components of a primary total hip arthroplasty	
12	procedure, Str	yker's website ³ claims,	
13		Building on over 30 years of clinical experience, Stryker Orthopaedics offers a wide range of primary femoral hip	
14		components designed to meet the needs of surgeions and patients. Time-tested design principles support our press-fit and cemented hip	
15		stem solutions. Additionally, Stryker Orthopaedics instrumentation	
16		platforms provide the orthopaedic surgeon flexibility to choose from many implant options helping them to intraopratively select the best implant for each potions.	
17		implant for each patient.	
18	16.	In March of 2000, Defendant received FDA clearance to sell its Acculade	
19	hip system in	the United States.	
20	17.	The Accolade stem is a monoblock, single piece artificial replacement that	
21	is designed to	be implanted in the patient's femur.

	FIRST AMENDED COMPLAINT FOR	- CRANE DUNHAM, PLLC	

206,292,9090 FAX 208,292,9736 ddunham@cranedunham.com

1	28. Upon information and belief, Defendant utilized sales agents to facilities	litate the
2	marketing, sales, and education process. These agents were sometimes employed	oyees of
3	Stryker but could also be independent contractors, as well.	
4	29. These sales agents were responsible for answering any ques	tions or
5	concerns surgeons, like Plaintiff's, had regarding the Accolade.	
6	30. At all times relevant to this complaint, Plaintiff's orthopedic	surgeon,
7	nurses, and hospital staff relied on information and assistance given by Defendar	it and its
8	g sales agents.	
9	THE RECALL OF THE STRYKER REJUVENATE HIP SYSTEM	
10	31. In 2012, Defendant recalled its Rejuvenate and ABG II mod	ular hip
11	1 systems.	
12	The Rejuvenate and ABG II modular hip systems utilized the same	e TMZF
13	3 titanium metal in the femoral stem as the Accolade.	
14	33. Similar to the Accolade, the modular neck of the Rejuvenate and	ABG II
15	were manufactured from cobalt/chromium.	
16	6 34. Patients of the Rejuvenate and ABG II experience failures of the	devices,
17	7 including but not limited to, reports of severe pain, metallosis, psuedotumors, lo	osening,
18	and tissue destruction.	
19	9 35. Upon information and belief, Defendant recalled the Rejuvenate a	ınd ABG
20	II because of these reports and failures.	
21	1 36. Upon information and belief, the revision rates for the Rejuvenate a	ınd ABG
22	II have been reported to exceed 50%.	
23	37. The scientific community has known for decades the combin	ation of
	SEATTLE, WASHINGTON 98121-2: 206.292.9090 FAX 206.292.973 ddunham@cranedunham.com	

titanium and cobalt/chromium results in significant fretting and corrosion when dissimilar 1 2 metals are combined. 3 38. Upon information and belief, prior to Plaintiff's implant and revision surgery, Defendant was aware of problems and defects with the Accolade, including, but 4 5 not limited to, fretting and corrosion. 6 39. Prior to marketing and selling the Accolade, Defendant was aware that no published research provided clinical support for its claim that "Laboratory testing demonstrates the compatibility of these materials without concern for fretting and 8 9 corrosion." 10 40. Prior to marketing and selling the Accolade, the Rejuvenate and the ABG 11 II, Defendant knew or should have known that the laboratory testing it claimed demonstrated the compatibility of the Titanium and Cobalt/Chromium was incomplete, 13] inconclusive, incorrect, and/or irrelevant when judging the clinical safety and effectiveness 14 of the hip systems. 15 41. Prior to marketing and selling the Accolade, Defendant knew or should have known that the Accolade was not a clinically safe prosthesis. 17 42. During the marketing and sale of the Accolade, Defendant knew or should 18 have known that the Accolade was not a clinically safe prosthesis. 43. 19 After Defendant began marketing and selling the Accolade, the Rejuvenate. 20 and the ABG II, Defendant quickly began receiving a high number of reports and warnings 21 from surgeons regarding failed Accolade, Rejuvenate and ABG II hip systems. 22 44. Defendant did not take proper action in response to surgeon reports and warnings. FIRST AMENDED -CRANE DUNHAM, PELC COMPLAINT FOR DAMAGES - 7 2121 FIFTH AVENUE SEATTLE, WASHINGTON 98121-2510

> 206.292,9090 FAX 206,292.9736 ddunham@cranedunham.com

1	45.	Despite knowing, or being in a position where it should have known of the
2	unreasonable	risks associated with the Accolade, Defendant continued to market and sell
3	the Accolade	System.
4	46.	On June 29 2012, Defendant finally recalled the Rejuvenate and ABG II
5	Systems.	
6	47.	According to Defendant the recall was due to the increased likelihood for
7	adverse local	tissue reactions (hereafter "ALTR") caused by fretting and corrosion around
8	the taper neck	junction of the modular stem and neck.
9	48.	After recalling the Rejuvenate and ABG II Systems, Defendant sponsored a
10	manuscript ti	tled, "Evaluation of painful total hip replacements / modular metal taper
11	junctions."	
12	49.	The purported intent of this manuscript, available on Defendant's website,
13	"is to discuss	the clinical presentation, evaluation and workup of patients who present with
14	persistent pai	n and symptoms after successful total hip arthroplasty with a metal taper
15	junction susp	ected of fretting and/or corrosion."
16	50.	This admission is in stark contrast to the marketing of the Accolade, which
17	stated that the	e TMZF stem was compatible with cobalt/chromium head "without concern
18	for fretting an	nd corrosion."
19	51.	At the time Defendant recalled the Rejuvenate and ABG II, it redesigned
20	the Accolade	stem and abandoned the use of the TMZF titanium and switched to a new
21	titanium alloy	′ .
22	52.	Upon information and belief, Defendant abandoned its use of the TMZF
23	titanium thros FIRST AMENDED COMPLAINT FOR

- 69. Defendant or Defendant's agent and/or employees selected and provided the specific Accolade manufactured by Defendant and delivered them to the operating room at St. Clare Hospital.
- 70. Defendant utilized sales representatives who were responsible for educating Plaintiff's orthopedic surgeon regarding the claimed advantages of the products used, answering any questions Plaintiff's orthopedic surgeon asked regarding the products, assisting Plaintiff's orthopedic surgeon at surgery regarding the products, and selling the products to Plaintiff through her orthopedic surgeon agent.
- 71. Defendant trained and educated its sales staff regarding the Accolade System, including orthopedic and surgical training, product design rationale, surgical technique tips, training in the use of implanting tools, training in selecting the hip replacement components to mate with the Accolade System, and training on how to sell to orthopedic surgeons, including training on the advantage of the Accolade System over its competitors.
- 72. Prior to Plaintiff's THA surgery, sales representatives of Defendant provided information to Plaintiff's orthopedic surgeon, including but not limited to, the advantages of the Accolade System compared to its competitors, information regarding the design rationale for the Accolade System, surgical techniques on how to implant the Accolade System, and demonstrations on how to implant the Accolade System and the components that could best be mated with the Accolade System, including providing a variety of scenarios involving the various instrumentation used in implanting the Accolade System.
